GET Object Description. This implementation of the GET operation retrieves objects from Amazon S3. To use GET, you must have READ access to the object. If you grant READ access to the anonymous user, you can return the object without using an authorization header. An Amazon S3 bucket has no directory hierarchy such as you would find in a typical computer file system.

Metadata such as object creation date is system controlled where only Amazon S3 can modify the value. Other system metadata, such as the storage class configured for the object and whether the object has server-side encryption enabled, are examples of system metadata whose values you control. If your bucket is configured as a website, sometimes you
