Just ten years ago, around half of all electricity generation in the U.S. was powered by coal. Today, that number has dropped to one third. Over that same ...

### **Is replacing coal with natural gas actually good for the**

environment? The answer is not clear. While natural gas is cleaner than coal, it still produces significant greenhouse gas emissions. The impact on the environment depends on many factors, including the source of the gas and the efficiency of the power generation process.
