Uses and gratifications theory (UGT) is an approach to understanding why and how people actively seek out

specific media to satisfy specific needs. UGT is an audience-centered approach to understanding mass communication. Diverging from other media effect theories that question "what does media do to people?", UGT focuses on "what do people do with media?"

Commissioner's message. The digital revolution, which many have described as the 4th industrial revolution, has brought important benefits to individuals, from ease of communications to greater accessibility of information, products and services that make our lives better materially and intellectually. It is and will continue to be a major contributor of economic growth.
