1. Introduction. Carbon fiber reinforced carbon composites (C/C) have a low density (up to 2.2 g/cm³), a low thermal linear expansion coefficient, high thermal conductivity, a stable friction coefficient, a high-energy absorption capability, and retain mechanical properties up to 2400–2800 °C (in vacuum or inert atmospheres). Due to such a specific combination of the properties, C/C ...

This edition is published by results of the 2018 International Symposium on Structural Integrity (ISSI2018, Nov. 2-5, 2018, Nanjing, China). The articles cover a variety of topics associated with research in the area of the structural integrity assessment and ensuring, while the fracture mechanics, damage mechanisms and structural strength aspects of engineering materials have been closely ...

This journal is concerned with original research, new developments, site measurements and case studies in rock mechanics and rock engineering. It provides an international forum for the publication of high quality papers on the subject of rock mechanics and the application of rock mechanics principles and techniques to mining and civil engineering projects built on or in rock masses.

Undergraduate Study. The Department of Mechanical Engineering (MechE) offers three programs of undergraduate study. The first of these, the traditional program that leads to the bachelor's degree in mechanical engineering, is a more structured program that prepares students for a broad range of career choices in the field of mechanical engineering.
