Database Tuning Principles, Experiments and

Activity of making a database application run faster: “Faster means higher throughput (or response time)

“ Avoiding transactions that create bottlenecks or avoiding queries that run for hours unnecessarily is a must. .

Database Tuning (part 1) - Computer Science / Free

Database Tuning. Database Tuning is the activity of making a database application run more quickly. “More quickly” usually means higher throughput, though it may mean lower response time for time-critical applications.
