Theory of operation. In the case where flow passes through a straight pipe to enter a centrifugal compressor the flow is straight, uniform and has no vorticity, ie swirling motion, so the swirl angle  $\hat{\pm} 1 = 0^\circ$  as illustrated. As the flow passes through the centrifugal impeller, the impeller forces the flow to spin faster as it gets further from the rotational axis.

Education. The education of structural engineers is usually through a civil engineering bachelor's degree, and

often a master's degree specializing in structural engineering. The fundamental core subjects for structural engineering are strength of materials or solid mechanics, Structural Analysis-Static & Dynamic, material science and numerical analysis.

The structural testing is the testing of the structure of the system or component. Structural testing is often referred to as "white box testing" or "glass box" or "clear-box testing" because in structural testing we are interested in what is happening "inside the system/application".
