Finding your location throughout the world!

Latitude Longitude Latitude and Longitude Lines To find a place exactly, we need crossing lines that create an intersection or grid system. One grid system used by cartographers is the Latitude and Longitude Grid. Each location on the globe touches a line of latitude and a line of longitude. The crossing of the latitude

Latitude and Longitude Lines - Portland State University

I usually introduce this lesson by comparing the coordinate system of latitude-longitude to the streets of New York City. As my students are all from New York, they generally are familiar with the system of streets and avenues, which very closely mirror the lines of latitude and longitude that are introduced in the lesson (Note: This part of the introduction is not contained in the handout).
