The Aqueduct tools enable users to measure, map, and mitigate water risks around the world with its open-source, and high-resolution platform. It uses multiple data layers to display water risks at any given location. Current water risks can be compared to those in the future, to visualize trends for optimistic, pessimistic, or business-as-usual climate and growth scenarios.

This paper introduces new users to the basics of the U.S. national income and product accounts (NIPAs). It discusses the economic concepts that underlie the NIPAs, and it describes the seven NIPA summary accounts. The Primer also provides a brief overview of the derivation of the NIPA measures and a list of references for further information.

An Excellent Alternative to Adobe Reader. PDF-XChange has some very nice features not found in Adobe Reader, but where it matters it follows the familiar shortcuts and layout of the established market leader. It is very customisable too, so if you don't like the defaults, many things can be modified.

Performance measures give us a way to assess healthcare against recognized standards. While measures come from many sources, those endorsed by the National Quality Forum have become a common point of reference. An NQF endorsement reflects rigorous scientific and evidence-based review, input from patients and their families, and the perspectives of people throughout the healthcare industry.
