Reference Library | MVP Health Care

A prescription is a health-care program implemented by a physician or other qualified health care practitioner in the form of instructions that govern the plan of care for an individual patient. The term often refers to a health care provider's written authorization for a patient to purchase a prescription drug from a pharmacist

Why are trans fats bad for you, polyunsaturated and monounsaturated fats good for you, and saturated fats somewhere in-between? For years, fat was a four-letterâ€¦

The truth about fats: the good, the bad, and the in
Patterns of nonmedical use of prescription opioids suggest that abuse most often starts with oral dosage forms. Once dependence is established, tolerance to opioids develops and it becomes more costly to maintain abuse; many users then employ more efficient routes of administration, such as IV injection, insufflation (blowing substances into the lungs), or smoking.
