

microstrip and printed antenna pdf

A patch antenna is a type of radio antenna with a low profile, which can be mounted on a flat surface. It consists of a flat rectangular sheet or "patch" of metal, mounted over a larger sheet of metal called a ground plane. They are the original type of microstrip antenna described by Howell in 1972; the two metal sheets together form a resonant piece of microstrip transmission line with a ...

Workshop Focus: The International Microelectronics Assembly and Packaging Society (IMAPS) and the IMAPS Huntsville Chapter will host an Advanced Technical Workshop on ADDITIVE MANUFACTURING. Printing technology is expected to enable the evolution of electronics from rigid boards and complex mechanical support structures to products that are flexible, conformal or wearable.

The "Beam and null switch step steerable antenna system" U.S. patent 4063250 by Richard C. Fenwick is a great explanation of time delay beam steering. The "phased array" antenna is a special case of the time delay steered antenna.

FOA Guide - Table of Contents This is the FOA's Guide To Fiber Optics & Premises Cabling. It includes almost a thousand pages of materials created by the FOA covering the basics to advanced topics on fiber optics and premises cabling. The goal of this website is educating students, users, designers, installers or anyone interested in the subject of fiber and cabling for communications systems.
